2017: A Look Back

What a year! As we close out 2017, we'd like to reflect on our progress and the accomplishments our stakeholders and partners made in advancing improved healthcare through health information exchange (HIE).

This year started with a lot of listening—I traveled across New York to meet with various stakeholders and learn more

about how NYeC and the [Statewide Health Information Network for New York \(SHIN-NY\)](#) support the State's efforts to improve care and lower costs. We worked closely with our stakeholders and the State to develop a multi-year roadmap to define the evolution of the SHIN-NY.

Focused on increasing adoption, data contribution, and usage of important value-based care services, the [SHIN-NY 2020 Roadmap](#) sets ambitious goals and employs a variety of tools, including new performance-based contracting, policy changes, and collective advocacy to continue to move our state's HIE forward. We have already started working towards achieving the goals laid out in the Roadmap and we will continue to do so in the coming years.

This year, we also worked to [modernize consent policies](#) in addition to cybersecurity policies, which help facilitate the use of the SHIN-NY. We [elected two new board members](#) and [honored several outgoing board members and two industry pioneers](#) for their work to advance healthcare through technology. We continued our [DEIP program](#) to encourage HIE adoption and our Healthcare Advisory Professional Services (HAPS) team continued its work to [assist healthcare providers in adopting and effectively using electronic health records](#). This work supports the flow of clinical information, improving connectivity and helping more people, providers, and health plans!

Our [Qualified Entity \(QE\)](#) partners continued their [community outreach](#) and [efforts to educate patients](#) and providers on the benefits of HIE. A new study was released showcasing the [effectiveness of HIE](#) and efforts were made to [improve data quality](#). Additionally, the New York Digital Health Innovation Lab (formerly the Digital Health Accelerator) continued its work to help foster [health technology innovation](#).

We are thankful for all for the work that you, our stakeholders, partners, community members, and friends, have done to move healthcare forward in New York State and for your support of our organization.

Looking ahead to 2018, we're excited to continue working together to support value-based care, enable digital health advancement and innovation, and drive performance improvement consistent with our mission, ultimately helping providers and plans keep communities healthier. Listening will be constant—the collection of customer and stakeholder feedback and input will be ongoing and vital as we work together to advance the SHIN-NY to transform healthcare for all New Yorkers.

Happy holidays!

I look forward to continuing our work in the new year.

Take care,

Valerie Grey
Executive Director, NYeC

NYeC MIPS Reporting and Support Services Now Open for Business

NYeC's comprehensive, CMS-Certified 2017 [Merit-based Incentive Payment System \(MIPS\) Reporting and Support Services](#) are open for registration! We offer full-service reporting and support services that enable MIPS eligible clinicians to elect the performance categories they want to report and at what pace. Service offerings include guidance to select measures, data collection tools, training, monthly webinars, support calls, and data integration from your EHR or claims data directly to a QCDR.

Providers Caring for an Aging Population Need Widespread HIE Use

Family medicine physician and former member of NYeC's Board of Directors, Eugene Heslin, MD recently spoke to EHRIntelligence.com about the importance of the [Statewide Health Information Network for New York \(SHIN-NY\)](#) and HIE development to support patient care in a medical field flooded with data. HIE use enables the level of provider communication necessary to support complex and chronic disease management for aging baby boomers.

A firm believer in the importance of encouraging all hospitals across New York to participate in the SHIN-NY, Dr. Heslin was recently recognized by NYeC for his commitment to advocating for the statewide HIE network. Advocacy is one of the strategic mainstays of the [SHIN-NY 2020 Roadmap](#), which outlines the network's plans to evolve in the coming years to support value-based care. Dr. Heslin said the aging baby boomer population presents a compelling use case for encouraging healthcare consumers to opt-in to the SHIN-NY.

HealthConnections Serves It Up in 2017

HealthConnections began 2017 on a high note with incredible momentum from the previous year. However, the HealthConnections team and its marketing firm, MPW Marketing, knew more could be done. With a well thought-out strategy, the company embarked on a mission to reach providers as its primary objective and, along the way, educate patients and medical professionals alike on the benefits of the HIE.

Capturing the Patient Voice with NEJM Catalyst

Incorporating the patient voice into healthcare delivery has proved challenging. *NEJM Catalyst* convened an in-person roundtable among clinicians, researchers, and patient advocates to address issues in depth. The roundtable and an accompanying survey point the way toward a framework for defining the patient voice and integrating it into care delivery.

NYeC Healthcare Advisory Professional Services

Advanced Primary Care (APC) Program

Healthcare is shifting from fee-for-service to value-based care, placing greater emphasis on patient-centered care. Is your practice prepared?

NYeC's [free Advanced Primary Care \(APC\) practice transformation services](#) help small and medium primary care practices deliver high-quality coordinated care, earn payment incentives, and prepare to thrive under value-based payment arrangements.

If you are interested in the APC program or for more information, please contact us at APC@nyehealth.org.

Behavioral Health Information Technology (BHIT) Program Update: Feedback Requested

Through the [BHIT Program](#), NYeC is working with designated provider agencies in the adoption, implementation, and upgrade of certified Electronic Health Record and Electronic Billing Software to successfully document and bill for their Adult BH-HCBS services to Medicaid Managed Care. We recently created a survey for participating provider organizations to gauge the vendor training experience of and offer a chance to provide feedback on trainings. This survey will not impact funding and is just being used as a means for collecting data.
